

33/2015 - 20 February 2015

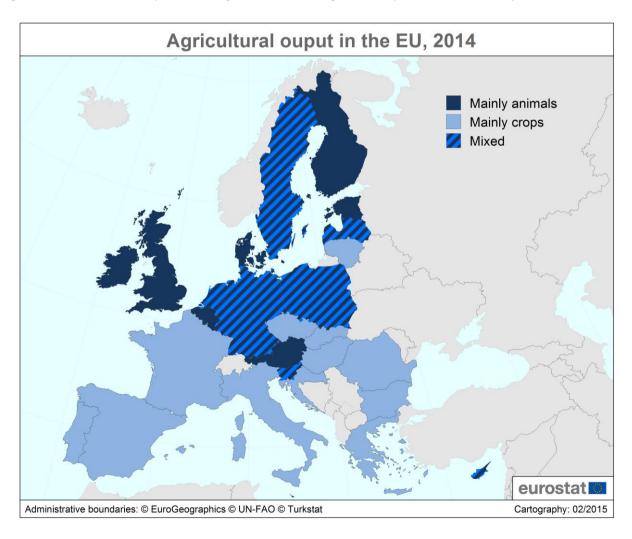

Statistical book on agriculture, forestry and fishery

Facts and figures on agriculture in the European Union

How many people work in the agricultural sector in each EU Member State? How have prices changed over recent years? Which Member State is the biggest producer of cereals, tomatoes, apples, meat or milk? How important are the forest resources in the European Union? How many tonnes of fish were caught and how large is aquaculture production?

Answers to these questions and many more can be found in the 2014 edition of the **statistical book on agriculture**, forestry and fishery¹ issued by Eurostat, the statistical office of the European Union.

This publication is divided into seven chapters, providing facts and figures about agricultural accounts and prices, agricultural products, agriculture and environment, forestry and fishery production. As 2014 was proclaimed the International Year of Family Farming² by the United Nations, the publication also provides specific focus on <u>family farming in the EU³</u> and an analysis of <u>changes in farm holdings</u>³ over a period of five or ten years.

Highest concentration on crops in Romania, on animal production in Ireland

In 2014, crops represented just over half (52%) of the total agricultural output of the **EU**, while animal products accounted for 43%. Crops contributed most to national agricultural output in **Romania** (73%), **Greece** (69%), **Bulgaria** (65%) and **Croatia** (62%), while animals were particularly significant in **Ireland** (70%), **Denmark** (63%) and **Finland** (60%).

The distribution of the total agricultural output was closely balanced between crops and animals in **Germany** (47% for crops, compared with 49% for animals), **Slovenia** (50% and 48%), **Sweden** (46% and 48%), **Latvia** (50% and 47%), **Cyprus** (52% and 48%), **Poland** (47% and 51%), **Luxembourg** (47% and 52%) and the **Netherlands** (48% and 42%).

Figures may not add up to 100% due to rounding.

Others include agricultural services and secondary activities.

²⁰¹⁴ data refer to the first estimates of agricultural accounts, which became available after the closing date of the publication.

France and Germany produce nearly 40% of cereals in the EU

In the **European Union**, 305.7 million tonnes of cereals were produced in 2013. **France** (67.3 mn t, 22% of total EU production) remained the largest producer, followed by **Germany** (47.8 mn t or 16%), **Poland** (28.5 mn t or 9%), **Spain** (25.4 mn t or 8%), **Romania** (20.9 mn t or 7%) and the **United Kingdom** (20.0 mn t or 7%).

Italy leads for tomatoes, Poland for apples

With a production of 5.2 million tonnes in 2013, **Italy** accounted for over a third (35%) of the production of tomatoes in the EU (14.9 mn t), ahead of **Spain** (3.8 mn t or 25%), **Portugal** (1.2 mn t or 8%) and **Greece** (1.0 mn t or 7%). For carrots, **Poland** and the **United Kingdom** (both 0.7 mn t or 14% each of the 5.1 mn t the EU produced) were the two main producers in 2013, followed by **Germany** and the **Netherlands** (both 0.6 mn t or 11% each), and **France** (0.5 mn t or 10%). Almost half of the EU production of onions (5.7 mn t) was recorded in the **Netherlands** (1.3 mn t or 23%) and **Spain** (1.2 mn t or 21%).

The production of apples in the EU amounted to 12.0 million tonnes in 2013, of which 26% (3.1 mn t) were produced in **Poland**, 18% in **Italy** (2.2 mn t) and 17% in **France** (2.1 mn t).

0 Less than 500 tonnes: Data not available

A quarter of pig meat is produced in Germany

With a production of 5.5 million tonnes, corresponding to 25% of the EU total, **Germany** was in 2013 the main producer of pig meat in the European Union, followed by **Spain** (3.4 mn t or 16%), while **France** was the main producer of bovine animals meat (1.4 mn t or 19% or EU total production). **France** also had the largest production of poultry meat in 2013, just ahead of the **United Kingdom** and **Poland** (all around 1.7 mn t). Together, these three Member States accounted for 40% of EU total production of poultry meat. For cows' milk, **Germany** (31.3 mn t or 20% of EU total production) and **France** (24.4 mn t or 16%) were by far the two main producers in the European Union in 2013.

- 2. Further information on the International Year of Family Farming is available on the website of the Food and Agriculture Organisation of the United Nations: http://www.fao.org/family-farming-2014/en/
- 3. Eurostat, Statistics Explained articles available on the Eurostat website: "Family farming in the EU" as well as "Evolution of farm holdings in the EU".
- 4. The basic price is the amount received by the producer from the purchaser for a unit of good or service produced as output. It includes subsidies on products and other taxes on production. It excludes taxes on products, other subsidies on production, suppliers' retail and wholesale margins, and separately invoiced transport and insurance charges. Basic prices are the prices most relevant for decision-making by suppliers.
