

# The CEMA Inspection Seal for Sprayers

## The Highest Guarantee – for You!

### The “CEMA Inspection Seal”: a Guarantee – for You!

Next time you buy a new sprayer and you want a local seal, make sure you look out as well for the CEMA Inspection Seal!

The CEMA Inspection Seal guarantees that the sprayer:

 has undergone strict in-house quality checks during production

 is in full conformity with all the latest EU safety & environmental requirements

 is ready for use in all EU markets, without additional inspection tests

### Why Look Out for the “CEMA Inspection Seal”?

Many European countries require users to provide a proof that their new sprayer can pass an individual in-use inspection. This makes it necessary to run a pre-check and obtain a national approval (the proof comes in the form of a local seal on the sprayer).

### The “CEMA Inspection Seal” – and You’re Done!

When you see a sprayer with the CEMA Inspection Seal placed on it, it means that the manufacturer is nationally authorised to use in-house quality checks to guarantee that the sprayer will pass the in-use inspection (so-called “In-House Test & Go”).

# The “CEMA Inspection Seal”: the Benefits for You

## Save time & money!

Say goodbye to costly end-checks. Thanks to the “CEMA Inspection Seal”, you can save this extra cost, as your sprayer performance is already ensured by in-house quality checks!

## “In-House Test & Go”: Your sprayer will pass the in-use inspection!

Thanks to “In-house Test & Go”, you can be sure your sprayer will pass the in-use inspection (EN ISO 16122).

## Promoting acceptance across borders

Thanks to its European scope, the “CEMA Inspection Seal” will be helpful when requesting a national approval in another EU country.
